

National Institute of Technology Calicut
Department of Computer Science and Engineering

Winter Semester – 2025-26

CS4032E: Computer Security
(S6 B. Tech. (CSE))

Security Assignment (Evaluation – I)

Max. Marks: 10

The report (not more than 10 pages) on the topic should contain the following:

- 1) Title of the security assignment – Name with Roll Number
 - Pick a topic that requires coding intervention rather than just executing the already existing tools – tools may be used as an additional support
- 2) Abstract – half a page (not more than 250 words)
- 3) Introduction
- 4) Literature Survey – *various tools/techniques* that is available in literature/articles/research papers – *discuss key functionalities* of each technique that you have come across – *summarize* the various tools/techniques that you have discussed highlighting and comparing the salient features, preferably in a table format.
- 5) System/Network environment for the implementation of the assignment – should specify the hardware and software requirements
- 6) Design of the various modules in the assignment – with technical explanation of each module with algorithm (input/output can be specified)
- 7) Progress of implementation, if any
- 8) Conclusion
- 9) References – research papers, online articles, websites, etc., as per [IEEE format](#)
- 10) Submit the Report as a pdf file in the Moodle. Format: *FirstName_RollNo.pdf*

Date of Submission: 11, April 2026 (Saturday 11:00 pm) – Hard deadline

NB: Students are expected to compile the report without GPT usage.
